Museum operations

Lac du Bonnet has a long and rich cultural heritage that is unique to Manitoba. Many communities in Manitoba owe their development and settlement of their lands by immigrant farmers. This has provided them with a rich agricultural heritage which is exemplified in local museums. Lac du Bonnet is situated on the interface between the rich prairie lands and the Canadian shield. This has provided a rich diversity of immigrants to our community, including farmers, lumbermen, trappers, miners and merchants. They were also able to interact with the native aboriginal people they found in the area. **It is the goal of the Society to highlight these unique features in the Museum.**

**We take this time to invite you to share your family history.**

The Society wishes to thank the donors of the artifacts that have been collected and catalogued during the past few months. This work is ongoing as the displays evolve. Artifacts are graciously accepted
